## Good Marks Obtained By Bassano Pupils

High School Pupils Do Well in Departmental Exams

Good marks were obtained by the pupils of Bassano school who wrote the departmental examinations last June. The results were last week given out by the department of education. Hereunder is a list of the results as compiled by Principal W. King.

**Third Year Students**  
 Eleanor Helleflower, passed all units.

**Second Year Students**  
 Stanley Wright, Eunice Powell, Barton Ford, Perry Johnson, Lloyd Leonard, Ralph Allison, Catherine Helleflower, passed all units.

Berice MacFarlane failed in physics; Andrew Cathro failed in algebra, composition and physics.

**First Year Students**  
 Juan Plummer, Alisa Hopkins, Roy McFarlane, Robert MacGregor, passed all units.

Quenelle Bramley passed all first year units but failed in French 2. Olive Hamer failed in history; Richard Rathbone failed in Algebra; Agnes Davila failed in French.

No report yet on Catherine McLean and Donald Power.

Stanley Wright obtained 77 per cent on his seven second year units (honors). Juan Plummer obtained 75 per cent on her seven first year units besides passing French 2 as an extra. No failures have been reported in literature 1, composition 1, history 1, chemistry 1, arithmetic 1, science 1, literature 1, literature 2, history 2, geometry 1, art 1, art 2, geometry 2.

Percentage of high school units passed by all Alberta students 75.9 per cent. Percentage of high school units passed by Calgary students last two years, 82.9 per cent. Percentage of high school units passed by Bassano students this year, approximately 90 per cent.

Placed into high school: Winifred Playfair, Sarah McDonald, George Scott, Ricardo Ubertino, Annie Ubertino, Roy Goyford, Stuart Patton.

Failed: Albert Cadot, Austin Ford, Jack Patton, Peter MacLean, Lillie Harvey.

## WOMEN'S INSTITUTE WILL CONVEY AT BROOKS

The Red Valley Constituency Women's Institute will hold their annual convention at Brooks on Monday, August 19th. Mrs. Olof of Champion, president, will attend, and Mrs. H. S. Johnson, of Bassano, convener, will preside.

## FARMERS' MEETING

There will be meeting of farmers at Counties Community Hall Wednesday evening, August 14th, calling together all farmers of the counties of Lethbridge, Lethbridge, and Counties district, looking toward the formation of a co-operative shipping association. A. B. Clarypold, president of the Alberta Live Stock Pool, will address the meeting.

## Hussar News

MURRAY, Aug. 7.—Mr. and Mrs. R. McGregor went to Banff for a holiday. They were accompanied by Mr. McGregor's brother.

A daughter was born to Mr. and Mrs. McDonald west to Calgary on Monday for a visit.

Mr. Middleton has returned to Calgary after visiting in Hussar.

The Girl Guides are camping at Crowfoot Creek. They are in charge of Mrs. A. A. Clifford and Mrs. R. J. Bell.

Joe Hines is starting to combine his wheat. Cutting with binders in the district north of Hussar will start in about a week.

Joe Harris and Marvella Anderson played for the dance at Robbours' near Crowfoot, last Tuesday evening.

Hussar Boys Play Good Ball

The Hussar junior baseball team won second money in the tournament at Chancellors last Wednesday.

Next week the senior team of Chancellors and Standard.

In the first game the Hussar boys defeated Chancellors 8-5, and in the final game lost to Standard 14-7.

The juniors won a game from Wintering Hills last Sunday afternoon with a 16-4 score.

**Will Play Double-Header**

The juniors will play a double header competition in Hussar next Sunday afternoon, August 11th; first game with Drumheller. The first game is scheduled to start at 1:30 p.m., and the second at 8:30 p.m.

## Duchess News

DUCHESSE, Aug. 8.—E. H. Sisson and family returned Wednesday night from a holiday spent in Calgary and Banff.

Mr. and Mrs. Witz, from across the Red River, were business visitors in Hussar Wednesday.

Mr. and Mrs. Siglen, of Idleshaigh, called on friends in Duchess on Thursday.

Miss Ruth Helt returned from Calgary and Banff last night.

W. A. Brodie, of Bassano, was a caller in town Wednesday evening.

**Obituary**

Mya Jeannette Larson Holmes was born April 8th, 1889, at Pawtucket, Kansas. She was married to Ravel H. Holmes August 14th, 1910.

To this union four children were born, one of whom preceded her in death. She united with the Congregational church at the age of 15.

She passed away at five o'clock in the morning, August 3rd. The funeral service was held in the Mennonite Church, and Rev. Henry Ramer presided.

The family wish to express their thanks and appreciation to their neighbors and friends for their sympathy and help in their bereavement.

**BROOKS BOXER KNOCKED OUT IN FIRST ROUND**

PED Helt made short work of Cecil Young, of Brooks, in a scheduled fight.

**First Shipment of Rye Received in Calgary**

The first shipment of rye to be received in Calgary this season was delivered in the grain inspection car on Wednesday morning from Brooks. The shipment, consisting of two carloads, graded 2CW, the highest grade.

The growers were Simpson Bros. and R. S. Taylor, while the agent of the Independent Grain Co. at Brooks, made the shipment.

The ten round bout at Bettler last Monday night, drew two minutes of the first round had elapsed when Befus fellled with his left and drove a straight right to Young's jaw. Young went down for the count.

**MONDAY AND TUESDAY, AUG. 19 AND 20**

**"ZIMBA"**

A picture story of the Martin Gumpston expedition in Africa. Not a single movie production has Africa be God made it, showing elephants, lions, and other wild beasts in their native haunts.

**Hussar Picture Program**

**"HIS DESTINY"**

A Canadian drama filmed in the Steveland Lodge and Band National Park.

Special program SATURDAY, AUG. 17th

A picture story of life in the African jungle showing wild beasts of the jungle and wild and native animals as wild as the beasts.

**Mon. & Tues. Aug. 12 & 13**

**"What a Night!"**

Dashing Bebe Daniels in a big comedy melodrama.

## Livestock Causes Damage To Town Irrigation Ditches

Complaint Made that Animals Are Allowed to Trample Down Ditch Banks

Town engineer Frank Mead, in giving his report to the town council at the regular monthly meeting last Monday evening, stated that stock had caused considerable trouble by trampling down the banks of irrigation ditches which permitted the water to escape and flow across the fields, causing loss, and thus rob the householder of water that should come down the ditches.

Most of the damage, he said, was being done by cows being driven across the ditches while going in and out from the premises of the owner of the animal.

As the animals in question were under restraint, no legal action could be taken against the owner under the present pound by-law. Mr. Mead suggested that the council look into this matter, and if possible, make provision for the control of trouble of this kind. The council referred the matter to a committee.

Mr. Mead also reported that, considerable work had been done on the sidewalk running, and also in the eradication of weeds.

J. W. Ford, town auditor, reported by letter that he had audited the town books in June 30th, and found everything in good order. His report was accepted.

Another rainless week, with bright warm sunshine has rapidly brought the grain to maturity, and in spite of the drought the wheat has filled fairly well and most of it should be of a good grade. The probable yield is still a matter of conjecture, but estimation on the run has run as high as 15 bushels to the acre, and many estimates being placed at ten bushels.

**A Little Mail**

The Gem district was visited by a hailstorm last Sunday, and some damage is reported to the extent of ten per cent. The hailstorm only a few minutes, and the storm was fairly large. The hail was accompanied by a light rainfall which measured a tenth of an inch on the C.P.R. D.N.R. rain gauge at Gem.

The wheat on irrigated land is coming along in fine shape, and some fields look good for 35 bushels to the acre. Harvesting of irrigated grain will not commence for about two weeks from this date.

**Some Good Crops In Wintering Hills**

The Gem district was visited by a hailstorm last Sunday, and some damage is reported to the extent of ten per cent. The hailstorm only a few minutes, and the storm was fairly large. ## NEW WHEAT STARTS ROLLING TO ELEVATORS

C. R. Burgess Delivers First Load of Wheat to Hussar—Cutting With Combines Will Be General Next Week

C. R. Burgess, who farms a couple of miles northwest of Hussar, delivered the first load of 1929 wheat in Hussar, Thursday, August 8th.

The grain was delivered to the Alberta Pacific Grain Co. Ltd. elevator, and was a very nice sample of wheat, having a good color and probably will grade No. 2 Northern.

Mr. Burgess is the only farmer in Hussar who is cutting the grain with a combine, and it is estimated the field in which he is now working will yield about 19 to 22 bushels to the acre.

Some farmers are cutting their grain with binders, and a large acreage has already gone down before the onslaught of these machines.

## Gen News

GEN, Aug. 7.—A severe hailstorm lasting only a few minutes hit the Colony on Sunday afternoon last.

Large quantities, some as large as large eggs, smashed windows in the C. P. R. home occupied by C. K. Douglas and also on the Reeling farm occupied by Clint Marquess.

Several farmers report a ten per cent damage to their crops.

Mr. Holmes, government weed inspector, spent Monday amongst the Gem weeds, and wednesday, too.

Don H. Bark, A. Porter and Rev. Garbndt were recent Colony visitors.

Our numerous new settlers enjoyed their first picnic in Gem. Many of them offered their help which was gladly accepted.

Mr. and Mrs. J. W. Kist motored from Indus Saturday. They spent Sunday visiting old acquaintances at Counties.

Ensie and Alice Cowen are spending the week with the Kier girls at Indus.

The farmers are beginning to cut the second crop of alfalfa.

Mrs. Kirkham, of Seattle, has been the guest of her sister, Mrs. P. J. Borsman.

Madames Holm, Smith, and Smith of Latham, Mrs. Anderson, Mrs. Blum, and Miss Marie Chamberlain, were entertained by Mrs. M. Gamble on Tuesday.

Mrs. J. Shaple is visiting her daughter at Edmonton.

Mrs. P. Borsman entertained the following ladies to afternoon tea on Sunday the 10th at her home.

Madames Holm, Smith, and Smith of Latham, Mrs. Anderson, Mrs. Blum, and Miss Marie Chamberlain, were entertained by Mrs. M. Gamble on Tuesday.

Everybody is welcome to the Sunday school at 6:30 o'clock, and church service at 7:30, Sunday evening.

Mrs. Gamble, Donna, and Marianne and Mrs. Blum were among the dinner guests at the Holm home in Latham Friday.

The irrigation water and the hot weather are certainly making wonderful gardens here in the irrigation district.

**Bassano Theatre**

**Man Takes Over Hussar Picture Show**

P. Ubertino Extends Operations to Northern Town

P. Ubertino, owner of the Gem Theatre, last week purchased the moving picture business in Hussar from Magnuson Bros. The theatre is now operating one show a week in Hussar, on Saturday night, and if business should warrant it, he intends to run two nights a week.

The Hussar picture show in Hussar is operated in the Community Hall. The present equipment is somewhat limited, but Mr. Ubertino intends to make some improvements. He will install other machine so as to run a continuous picture without interruptions between reels. Other improvements are planned, and Mr. Ubertino expects to have the theatre-goers good pictures and good service.

**Irrigation Water Supplied Only Two Days Each Week**

Now that the season is passed in which there is a heavy demand for irrigation water for gardens, lawns, and trees, the town public works department has decided to turn on the water only two days each week.

G. Delekman returned to the Colony on Sunday last. Mrs. Delekman is now residing at the home of her brother in Iowa, after receiving treatment from the famous Mayo Brothers in Rochester. Her many Gem friends wish her a speedy recovery and safe return.

Miss E. Selfridge, of Calgary, spent a pleasant day with C. J. Jones, of Wintering Hills, during the past week.

Stanley Selfridge is cutting wheat for the last time. He is using a swather.

Miss F. Delekman, Ray, and Mrs. Turner, spent a pleasant Sunday with Mr. and Mrs. Stanley Selfridge.

G. Delekman joined them during the afternoon.

Mrs. and Miss O'Callaghan spent a pleasant Sunday with Mrs. Grier.

A number of young people in the Colony motored to Dorothy in Sunday afternoon to watch the basketball game played by the Dorothy and Gem boys. The Gem boys won by a large margin.

Mr. Borsman, of Bassano, was a Sunday caller on Mrs. Harro, and also on Mrs. and Mr. Maguire.

Mrs. Harro entertained friends from Gleichen on Sunday last.

**McKee Building New Quarters For Men's Store**

New Quarters Will be at Base of Groceries Here, and Front Third Street.

Work started early this week on the new premises for McKee's men's wear store. The new men's wear department will have a store front on Third Street, and will extend east at the rear of the grocery department and dry-goods store, occupying that space which is now used for dishes and crockery at the rear of the store.

In addition to the entrance on Third Street there will also be an entrance through the grocery store. The new men's wear store will measure about 18 by 50 feet, and it will be fitted out with show cases, racks, display cases, and all the equipment necessary in a store carrying a complete line of men's and boys' wear.

Mr. McKee expects to have the new building in operation by the 1st of September.

**W. I. HOLD PICNIC**

The Bassano Women's Institute held a picnic at Crowfoot last Wednesday afternoon. The picnic was a success, and the ladies and their families, and also the Girl Guides, attended, numbering in all about sixty people. The sports included a relay race, a tug-of-war, and a picnic, and everybody had a very enjoyable time.

The members of the W. I. wish to thank everybody who helped make the picnic a success.

**"I" Girl Hits With Glyn Tale**

Paramount has added another picture to the list of pictures which it is showing in the Gem Theatre. "Three Week Ends," Clara Bow, new Elton Glyn picture, which will be shown at the Gem Theatre Friday and Saturday night, August 16th and 17th, is one of the latest films from this studio, and it is a new sensation.

Though it is only a "little" picture, it is a very "big" picture. "Three Week Ends" is the first of the Clara Bow-Elton Glyn pictures and about the second. "Red Hots" it is a picture of love and laughter, with the Bow personality whirling all through it.

You will derive far more satisfaction from SALADA than you will from cheap tea

## Reform Of Electoral Methods

Recent elections in Great Britain, in Canada, and more recently still in the Province of Saskatchewan, all seem to point in the same direction, and that is to a change in the system or methods of choosing Parliamentary representatives. For many generations the underlying principle of the British system of responsible government has been ruled by the majority of the people as indicated by their selection of party representatives in the House of Commons or Legislative Assembly, as the case may be. And such representatives were chosen for the most part, by constituency represented by a single member. So long as the electorate were divided into only major parties or groups of political thought this system worked fairly well, although it was never wholly representative of public opinion.

Now, however, that the two-party system has been, or is being, replaced by three and sometimes four or more parties, the weaknesses of the old system have become apparent, and the old principle of rule by majority is rapidly becoming impossible of realization. On the contrary, at Westminster, at Ottawa, at Regina, each party represented in Parliament is a minority party, and in each instance the smallest of these minority groups holds the balance of power. In each of the legislative bodies referred to, the group having the largest representation in the House constitutes the government party, but at any moment, and on any question that may arise, the government may suffer defeat and be called upon to give place to another minority group.

With the recognition of the United States where the two-party system continues in favor, partly perhaps, because it is so interwoven into the life of the fabric of government, national, state, municipal, even county and local, it appears to be giving way throughout the world. In Germany, France, Belgium, and other countries having responsible government, the government is only possible by a coalition of parties, or a working understanding between them. Admittedly, it does not make for strong government or stability in government, France being a notable example.

The multiplicity of political parties or groups has also made it impossible to bring about change of electoral methods. In some, single member constituencies have been abolished, the single transferable ballot, or Proportional Representation adopted, or the second election system inaugurated. Even in the United States the primary system has been changed to a second election. In a word, it is recognized that the single member constituency where a mere plurality of votes is sufficient to elect, regardless of the number of candidates in the field, no longer meets the needs of the situation.

And it is becoming increasingly evident that it will not for long prove acceptable to the people of Great Britain, or Canada, or in the Provinces of Canada. Opponents of Proportional Representation have always argued that it tends to a multiplication of parties or groups, but the fact now has to be faced that this multiplication has taken place under the existing system. The system itself, therefore, must be altered to meet the changed conditions.

Most politicians will not welcome any change, but they cannot prevent it. The important question is What basis of representation and method of voting shall be adopted to best meet the needs of the new conditions that have arisen? Already the subject is engaging the attention of political statesmen in Great Britain, and it is confidently predicted that the rewritten constitution of the Old Country will undergo some change. Occupying the commanding position he does in the present Parliament, and suffering the handicap of a much smaller representation in the House of Commons than the vote polled by his candidates in the country party entitles him to, Lloyd George will not long remain content with things as they are. He can, and probably will, demand as a condition of his continued support of the Ramsey MacDonald Labor Government a reform of electoral methods and machinery which will accord full value to every individual vote cast, and not place third or fourth party candidates at a distinct disadvantage.

Whether the solution is to be found in larger multiple-member constituencies replacing the present single-member seats, with the adoption of the single transferable ballot, or even Proportional Representation, or in a complete change in the accepted form of cabinet responsibility, involving a fixed term for Parliaments and Legislatures, denial to a government of the right of dissolution except upon a straight vote of want of confidence, and the formation of a cabinet composed of representatives of all groups, based upon their respective numerical strength in the House, time alone will disclose.

One thing, however, may be accepted as sound, and that is that the genius of British statesmanship which in the past secured the best form of democratic government the world has yet known will be capable of meeting the new situation and solving the problems which it presents.

## Plane in Freak Accident

Strikes Steam Roller in Making Landing At Roosevelt Field

When an aeroplane and a steam roller collided at Roosevelt Field, N.Y., the accident ruined the plane and injured the operator of the roller.

James Riddle, piloting a mail

monoplane in which two friends were riding as passengers, chose for his landing a part of the field which is being levelled off and on which two steam rollers were at work, hidden from the air by the cloud of dust they raised.

The dusting plane took off the smoke stack of one of the rollers and broke the operator, A. C. Madheral, from his seat, breaking his shoulder. The plane crashed, tearing off the left wing, and otherwise damaging it beyond repair, but Riddle and his passengers escaped without injury.

## Plant Grows Leaves After Having "Sleep"

Replaces Withered Foliage In Fifteen or Twenty Minutes

After "sleep" of from 15 to 20 minutes, a plant, recently developed in Germany, produces new leaves. So sensitive is it that if the leaves are touched, or a match burned near them, they immediately wither and fall off. In about a quarter of an hour after the withered leaves have dropped off, new ones grow out. The plant is a member of the mimosa family. It grows in great quantities in India, where it is gathered and sold for commercial purposes. The bruised leaves are said to have a high medicinal value in healing burns.

## U.S. To Reduce Military Expenses

President Hoover Says Military Budget Now Greater Than Any Other Country

President Hoover intends to establish a commission of army officers within the general staff to see what can be done toward reducing military expenditures.

The commission, the president said recently, would be charged with making an enquiry to determine what has been made obsolete by scientific advancements and could be done away with, and what army programmes can be spread over longer periods than originally intended and at the same time maintain complete and adequate preparedness.

The president said the purely military expenses of the United States constitute a military budget greater than that of any other nation and at a time when he considers there is less danger of war than at any period within the last fifty years.

It is now estimated, he said, that the military outlay for 1923 will be \$2,000,000,000, or more than the similar expenditure for the fiscal year just closed, and compares with an average pre-war expenditure for military activities of the army and navy of \$260,000,000 annually.

## NEW HEALTH FOR TIRED-OUT WOMEN

Found In the Rich, Red Blood Dr. Williams' Pink Pills

Actual Case Made. Anemia comes on gradually, beginning with languor, indigestion to mental or bodily exertion, irritability and a feeling of depression. Later comes the paleness of the heart, the loss of appetite, the loss of sleep, and often disturbed digestion and an inability to obtain rest at night.

Cases of this kind, if neglected, become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills, which are free from any harmful or habit-forming drug, are just the tonic needed to remedy this wretched state of health. These pills actually make the rich, red blood that stimulates and invigorates every organ of the body. This strength and ability to return the appetite improves the restful sleep is had. What Dr. Williams' Pink Pills can and will do is shown by the case of Mrs. D. H. Fanning, Salt Harbor, N.S., who says: "I was in a badly run-down condition. I could not get my appetite was very poor, and the least exertion would leave me completely tired. In fact I was hardly able to do much of anything. I decided to try Dr. Williams' Pink Pills and after taking a few boxes can truly say I feel better than I have for many years. I had gained greatly in health and strength and was able to do all my work with no sign of the former weakness. I cheerfully recommend them to all who are suffering from a run-down condition."

You can get the pills from your druggist, or from the 50-cent box from Dr. Williams' Medicine Co., Brockville, Ont.

Cyclists Honor War Dead

Nearly 10,000 cyclists, many of whom had ridden right from the extremes of England and Wales, gathered on a recent Sunday morning before the National Cyclists' Memorial, at Strichen, believed to be the exact center of England. About 3,000 of the cyclists were girls, and an excellent turnout for all manner of a bike service was held at the memorial, which was erected seven years ago to commemorate cyclists slain in the World War.

For Seals Or Burns. Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of eczema and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent treatment for all manner of cuts, bruises and sprains, as well as for relieving the pain arising from inflammation of various kinds. A bottle in the house and stable can save a doctor's and veterinarian's fee.

Canada's Iron-Making Centres

The three iron-making centres in Canada are: Sydney, Nova Scotia, on the Atlantic Coast, and Hamilton and Sault Ste. Marie in the province of Ontario.

Minard's Liniment for Neuritis.

Dr. Malcolm Barent, the famous English orchestra conductor, has just received \$35,000 as musical director of a London motion picture theatre which would require only three ten-minute appearances a day.

Putnam's Corn Extractor

Alberta Premier Tours North

Part Of Province

Hon. J. E. Brownie, premier of Alberta, and Dr. R. C. Wallace, president of the University of Alberta, have left Edmonton for the Northern Alberta Railway for the "Peace River country on a four weeks' tour of the north in which they will use railway, power boat, auto and aeroplane.

Their itinerary will take them as far as Port Pelly, on the northern edge of the province, then into the Northwest Territories to Great Slave Lake and as far east as Lake Athabasca, on the northeastern corner of Alberta.

They were accompanied by John M. Irvine, managing director of the Edmonton Journal, who joined the party on Premier Brownie's invitation. This will be the first time in the history of the province of Alberta that the head of Alberta's government and the head of Alberta's university will travel to the extreme northern boundary of the province.

The itinerary also includes a four day speaking tour of the Peace River country by the premier, a visit to the Wolf Buffalo Park and inspection of mineral development in Great Slave Lake and around Lake Athabasca.

Inspector Hancock of the Alberta Provincial Police is in charge of all arrangements.

Many Claimants For Car's Fortune

Three Cornered Legal Fight For Millions Lost By Assassinated Ruler

The personal fortune of the late Car Nicholas II. of Russia, reported to be approximately \$100,000,000, has become the object of a three-cornered legal fight which is expected to be tied up in the courts for years.

The Soviet Government is the last party to lay claim to the fortune, much of which is supposed to be in deposit in the United States. Another claim has been entered by a woman, now in the United States, who says she is Princess Anastasia, youngest daughter of the Car and the only member of the family to escape assassination in the revolution.

She is known as Mrs. Tschakovsky. Recognized relatives of the late Car, who claim Mme. Tschakovsky is an impostor, also are fighting for a share of the money.

Keeps a Mouse Farm

Having ever heard of a mouse farm? There is one at Rayleigh, in Essex, where mice are reared just as cattle and sheep are on ordinary farms. There are 50,000 mice, and of nearly every color. Yet, although there are so many, Mr. Tuck, the farmer, can put his hands on any one at a moment's notice. About three hundred young ones are born every day, and it takes five hours to feed them. They are sold to colleges and hospitals for experiments.

Garage For Women Autoists

A garage for the sole use of women autoists has just been adopted by women in London. A club devoted to feminine pursuits is a feature. Here fair motorists have writing rooms and dressing and change rooms, with bathrooms adjoining.

Minard's Liniment for Summer Colds.

## Planes Show Increase Greater Number Of Immigrants In Dominion Visitation This Year

From the annual report of the superintendent of Canadian immigration for 1922, recently issued by the Dominion Department of Immigration, it appears that on March 31, of that year, the number of immigrants numbered 2,560, an increase of 80 over the total of the preceding year, the average daily population being 2,423.

Of the immigrants, 998 were serving sentences of one year and upwards, with 138 life terms. Divided by age, the proportions were 338 under twenty years, 1,137 between twenty and thirty, and 40 upwards of 40 years old. Attention is called to the fact that many young men with long criminal records have been received of late years, one institution returning 22 newcomers' cards showing twenty of the inmates to have had previous convictions within the last five years.

By no means all of the fifty years, twelve to his discredit, and several others from four to six. The majority of men sent to the penitentiaries are by no means first offenders.

Interesting figures are also provided regarding the nationalities of the 2,560 offenders. Of these, 1,918 were of British birth, 1,589 from Canada, 197 from England and Wales, 69 from Scotland, and 35 from the United States.

From Austria-Hungary, 53 from Czechoslovakia, 32 from Rumania, and 120 from various smaller countries. Regarding their social habits, 503 were returned as abstainers from alcohol, 1,511 as temperate, and 446 as total abstainers.

Of those entered as chamois hunters, 100 were returned as half over the Roman Catholic persuasion. Each prisoner cost the country \$150 a day.

Advertised Goods Higher In Quality

In Finding Of Survey Made By Marquette Students

A survey made by the students of the "Robert A. Johnson College of Business Administration, Marquette University, brought out some interesting data. Ten students, under the supervision of Dean John Freeman Pyle, interviewed 300 men and women in high schools of this country.

Advertised goods were found to be higher in quality than unadvertised products. Advertising was found to be an incentive for human endeavor, and that the advertiser who raised their standard of living and afforded them more comforts.

Many have written to the King's Prize man from Guernsey, one of the Channel Islands, expressing the hope that he is a teetotaler.

It Bids Pain Begone—When neuralgia racks the nerves, or lumbago, general manager of western hotels, Canadian Pacific Hotel, says the mountain resorts are looked almost solidly for the season, he said, especially the hotels at Banff and Lake Louise.

Trucks of 4,000 elephants go into the world's annual supply of billiard balls.

The Only Explanation

To irate customers entering the butcher shop, throw a piece of metal on the counter and indignantly exclaimed: "What do you call that, sir?"

The man examined it and replied: "It looks like a piece of brass to me."

"Piece of brass—of course it is! And do you know where I found it? In one of your sausages!"

The butcher put up his hand, rubbed his double chin, and said he thought he could explain it.

"Yes, and explain it you will before I leave this place."

"Well," drawled the butcher, as he smacked his lips, "I must have forgotten to take the collar off."

Held Fast By Ice

The steamer Haychimino and the motorship "Old Maid II," of Vancouver, B.C., and the ship "Patience," of Seattle, were held fast in Point Barrow ice-locked harbor on the night of May 10.

The ship "Patience" was held fast by a shift in the wind blows the heavy ice pack towards the North Pole, which usually happens some time in August. They are trying to get around Point Barrow into the Arctic.

Taking Advantage Of New Law

The landlords of France are having a busy and happy time of it this summer raising the rent. It is, in fact, the first time they have been allowed to do so in several years. A new rent law became effective July 1, giving owners the right to ask more money for occupants of offices and apartments.

HUNTER-MARTIN & CO., REGINA, SASK.

## Reduce Crop Likely To Halt Immigration

Some Of Departmental Money May Be Used To Assist Farmers

The crop situation in Western Canada will have a salutary effect on immigration, it is believed in the capital. The investigations of Mr. Robert Forke in limiting continental immigration and shutting it off on May 31, is considered as having prevented a more serious situation in the west and led to some extent the inevitable burden of unemployment which follows a poor crop year.

Mr. Forke has been in Western Canada with W. J. Egan, his deputy, and it would not cause surprise at Ottawa to find that still further restrictions will be placed on continental immigration, and that even British immigration may be pared down.

At present any Britisher can come to Canada at the low rate of \$50. The nominal rate is \$90, the balance being made up by the British and Canadian governments. With poor crops in the west and less employment, the government will guard against an undue influx which may avail the unemployed. Farmers cannot carry hired hands through the winter when the crop has been poor, and the cities will have enough unemployed with those already here.

There is even a suggestion that some of the immigration expenditure may be diverted to assist the farmers, should conditions develop along the lines now so apparent. The land settlement board, formerly the public settlement board, may be called upon to keep track of the farmers in the various stricken districts and render such aid as may be possible.

Prince Receives Prize Winner

Successful Marksmen at Blaisy Also Had Messages of Congratulations

The Prince of Wales, Viscountess, Lord-Col. R. M. Blair, commanding officer of the Seaforth Highlanders, Vancouver, B.C., at St. James Palace and congratulated him on his success in winning the King's Prize at the recent meet of the National Rifle Association at Blaisy. In addition to a host of messages from Canada, Lord-Col. Blair is especially gratified by the receipt of congratulatory letters from every one of the Seaforth Highlanders in the British army, he said. An old lady, a perfect stranger to Lord-Col. Blair, has written to the King's Prize man from Guernsey, one of the Channel Islands, expressing the hope that he is a teetotaler.

Recognized as a leading expert for the destruction of worms, Moulton, in the year 1922, proved a boon to suffering children everywhere. It seldom fails.

Tourist Traffic Heavy

Tourist traffic in the west will break all records this year, judging from present indications, in the view of H. P. Matthews, of Winnipeg, general manager of western hotels, Canadian Pacific Hotel, says the mountain resorts are looked almost solidly for the season, he said, especially the hotels at Banff and Lake Louise.

Trucks of 4,000 elephants go into the world's annual supply of billiard balls.

The Only Explanation

To irate customers entering the butcher shop, throw a piece of metal on the counter and indignantly exclaimed: "What do you call that, sir?"

The man examined it and replied: "It looks like a piece of brass to me."

"Piece of brass—of course it is! And do you know where I found it? In one of your sausages!"

The butcher put up his hand, rubbed his double chin, and said he thought he could explain it.

"Yes, and explain it you will before I leave this place."

"Well," drawled the butcher, as he smacked his lips, "I must have forgotten to take the collar off."

Held Fast By Ice

No transatlantic flight seems to be complete these days without its stopover.

A party of Glenora business men visited Bassano and Brooks last Monday to inspect irrigation and tree growing in both towns. They plan to acquire Glenora by the growing of shade trees, and during their trip gathered much information which will be of value to them in that work. We wish them success.

**THE HALF HOLIDAY**  
The Wednesday half holiday, which was put into effect in Bassano last year, appears to be working out to the satisfaction of everybody. Townspeople and farmers, and now accustomed to it, and most of them adjust their shopping so that they are not required to visit the stores on Wednesday afternoons.

The merchants and clerks find the half holiday a great boon. It gives them an opportunity in the middle of the week, of getting out in the fresh air and enjoying sport and exercise, and most of them take advantage of it. The only inconvenience will be the half holiday might cause it to a farmer who may need repairs for his machinery, and in whom a day of half a day might mean the loss of considerable money. But in cases like this the farmer will find the implement agents willing to oblige him and supply him with the needed repairs so that he will not be inconvenienced.

The Wednesday half holiday has come to stay.

**A SWIMMING CLUB**

A number of those interested in the Bassano swimming pool are considering the formation of a swimming club. Swimming is becoming very popular. Scores of men and women, boys and girls, use the pool and enjoy swimming there. But, it is pointed out, there is no organized sport, no races, contests, or games.

A swimming club would provide organized sport along these lines, lay down rules and regulations for the use of the pool, and stimulate interest in this branch of athletics. No date has as yet been fixed for a meeting to organize a swimming club, but those interested are planning to hold a meeting very soon. They would like to have the co-operation of everyone interested, and would welcome any suggestions as to how the pool could be best managed, the holding of races and competitions, etc. The season is getting rather late to accomplish much this year other than organizing and making plans, but if this much is accomplished the club will be prepared to begin operations at the opening of the 1936 season.

**GOOD RESULTS**

Parents of pupils attending the Bassano high school should be well pleased with the marks their children obtained in the departmental examinations this year. The percentage of high school pupils passed by Bassano pupils was this year more than 90 per cent; for the whole province it was about 76 per cent, and for the city of Calgary for the past two years it has been about 81 per cent. Bassano students thus show a higher passing average than those of Calgary or the province as a whole.

The examination results are a credit to the intelligence of the Bassano pupils and the ability of their teacher.

The Arabs have a saying: "I am against my brother and my brother and I are against my cousin, but my brother and my cousin and I are against the world."

Because women now use public barber shops the number of shaves in the large cities of the Dominion has increased by thirty per cent in the past two years.

According to a radio message from Byrd's exploring camp in the Antarctic, the coldest day experienced there, far, registered 67 below zero with a stiff southeast wind blowing.

Thirty-two out of forty-seven nations which have been in conference at Geneva during July have signed a new agreement for the better treatment of sick and wounded in war.

Twenty-one people were killed in Ontario last week in drowning and auto accidents.

**LOVE IS A POOR SHOPKEEPER**  
(by Anderson M. Scruggs)  
God is a poor shopkeeper, as it seems. He gives no thought to market or supply. That heaps the countries of the earth with dreams. That heavy-minded people will not buy. In most absurd extravagance He throws His rainbow-faded scarves around the sun. And on the canopy at night He strews A million gems to feast the eye upon. But people passing by will take no heed. Whose minds are turbulent with little things. Enough for them that each tomorrow brings The tawdry toys that satisfy their need. God looks down from His mountains in amazement. And sees them rushing to some bargain basement.

**THRIFT**  
Editor, The Mail:  
While Great Britain is convulsed with the problem of emigration and unemployment and every conceivable means which politicians and economists can devise to transfer surplus population to "the Colonies" is being employed, France has no unemployment, no strike, no labor problem, and is actually drawing five million pounds sterling of gold from London banks weekly, on account of her increasing volume of trade and manufactures.  
It is true that France lost heavily in man power during the war, but there she was, while other nations have been trying to send away surplus population. France has actually assimilated over 200,000 Russians, about 100,000 Italians, and about 50,000 Poles. With these added foreigners, France still has no labor or emigration problem, and is absolutely thriving and humming with industry.  
I certainly think Great Britain and the rest of us could learn a most thrilling lesson in thrift by studying intently and seriously, the French method of handling our great problems.  
Yours truly,  
BERT HUFFMAN.  
Langdon, Alta., Aug. 6th, 1936.

## Local News

Mr. and Mrs. W. E. Hambrooke moved to Calgary on Tuesday.

P. Oberling made a business trip to Calgary Thursday.

Mrs. Mason, of Windsor, Ontario, is visiting with her daughter, Mrs. W. Kink.

Stephen Johnson will return to Wayne next term as principal of the school there.

Miss Violet Bramley will teach at Maria during the coming school term.

Martin Haynes returned home Wednesday from Grange Prairie and Peace River.

Mr. and Mrs. D. Catho, Mary, and W. J. Blankstein motored to Carmichael on Wednesday.

Irvin Young was in from Majorville last Tuesday. He reports the crops are looking fair in his district.

E. H. McCaighery, of Calgary, was a visitor in Bassano on Wednesday of this week.

A number of Bassano young people attended the bon dance at Rudbourne's last Tuesday evening.

Mrs. R. H. Stratton returned Wednesday from Medicine Hat where she visited for a few days with her sister, Mrs. Bond.

Mr. and Mrs. Frank Bell, of Chumey, Saskatchewan, former residents of Bassano, were visiting in town last week.

Mr. and Mrs. H. W. Ford and children and Mr. and Mrs. E. A. Beck and children are now holidaying at Waterton Lakes.

Mr. and Mrs. J. K. K. of Indian Head, and Mr. and Mrs. J. K. K. of Indian Head, are on their way from Hamilton, Ontario, to Calgary, were week-long visitors with the Warrens.

Wm. Scott, of Calgary, is employed as clerk in Jan. Johnson's store, taking the place of S. Scott, who left Tuesday night for Seattle.

J. W. Wheeler, of Calgary, is a new member of the local branch of the Royal Bank, taking the place of Fred Holmes, who goes to London.

Fred Holmes has been transferred to the Royal Bank branch at Langdon and will take on his duties there as soon as his liabilities are over.

The members of the Women's Institute were guests last Friday at a lawn social at the home of the president, Mrs. E. E. Condit.

Donald MacGregor has been engaged as teacher at Altario school. Altario is about 65 miles east of Camarostan.

Wednesday of next week, August 15th, is the last Wednesday half holiday of 1929. For the remainder of the year the stores will be open until 6:30 p.m.

Wallace Flanagan and Miss McCarver motored to Calgary on Wednesday. They will return with Mr. Flanagan's mother, of Paris, Ontario, who will visit in Bassano.

Geo. McDonald, who has been employed in Harvey Smith's office for the past year, left on Tuesday for Calgary where he is in position with S. W. Gilroy & Co., Ltd., brokers and real estate agents. Mac's genial personality won him many friends in Bassano, and they are sorry to see him leave.

Sunny had just returned from his first attendance at Sunday school. He beamed proudly. He announced that the minister had spoken to him.

"Oh," said his father. "And what did the minister say to you?"

"He told me to keep quiet," replied Sunny.

Wood: "Do you think kissing is unhealthy?"

Stenographer: "I don't know. I've never been—"

Wood: "What! Never been kissed?"

Stenographer: "No. I've never been hit after it."

All About the Lullaby Limited.

Doctor: "I will give you a local anesthetic if you think it necessary."

Nervous Man: "Well, Doc, if it's going to hurt I reckon you'd better cut out the local and run me through on a sleeper."

Prisoners' Path.

"Did you notice that Mrs. Blank's cat got a black eye?"

"Yes, it ain't respectable, or with or without an out of prison for another week yet."

## HEALTH SERVICE of the CANADIAN MEDICAL ASSOCIATION LOCKJAW OR TETANUS

The disease tetanus is commonly called lockjaw because, when it occurs, the mouth becomes firmly fixed due to the rigid condition of the muscles of the jaw. The disease is caused by a germ whose entrance to the body is usually gained through a wound which tears the tissues of the body or which punctures them.

The germ of tetanus has certain peculiarities. It grows best where there is no air, and so it thrives at the bottom of a punctured wound or in the depths of a lacerated wound where air does not penetrate. This germ belongs to the group of germs which are able to form spores. The spore is a resistant state into which the germ goes when conditions for its living are unfavorable, and in this state it is able to lie dormant for long periods of time. The spore becomes an active germ again when conditions are favorable, and in this state it is able to enter the human body through a wound.

The germ of tetanus lives in the intestines of cows, horses, and sheep. Any sound received on the farm, or any sound contaminated by dirt, goes regularly if the dirt is at all likely to contain manure, such as street dirt, is very likely to contain tetanus germs. The most favorable environment for the type of wound favorable to tetanus. We may say that in any wound where dirt is forced under the skin, there is danger of tetanus.

Every wound, no matter how slight, should be thoroughly cleaned with soap and water, and then covered so as to keep it clean. Every wound where dirt has been driven under the skin should be treated by a doctor.

Tetanus can be prevented. The wound should be properly cared for, and, in addition, when there is any suspicion that it is the type of wound in which tetanus is likely to occur, tetanus antitoxin should be given. The antitoxin was given to a man who was wounded previous to tetanus antitoxin with the result that the disease was practically prevented. Preventive measures should always be taken, because if the disease is allowed to develop, the outlook is

bad as far as treatment is concerned. Questions concerning health, addressed to the Canadian Medical Association, 154 College St., Toronto, will be answered personally by letter.

## VARIATION IN CREAM TESTS

When cream tests vary there is apt to be friction between creamery operators and their patrons. L. A. Gilbey, dairy consulting for Manitoba, lists five reasons for such variations in the test: 1, speed at which the milk is fed into the bowl; 2, changes in the temperature of the milk separated; 3, the richness of the milk separated; 4, the richness of the milk separated; 5, amount of skim milk or water used in flushing the separator bowl. Any one of these factors may change the

test of cream without change in the cream itself. If tests have not been even, check over the operation of the separator with these five points in mind and perhaps the trouble will be located.

The temperature at which the cream is kept before delivery to the creamery is also a very important factor. The cream should be kept as cool as possible.

## Vice Versa

Two men thrown together at a horse show were discussing their acquaintance with the equine tribe.

"A horse ran away with me once, and I wasn't out for two months," remarked one.

"That's nothing," replied the other. "I ran away with a horse once, and I wasn't out for two years."

## Progress

SOUND business principles and a policy of gradual expansion have marked the steady growth of this Bank for sixty years.

Today, one of the largest and strongest banks in the world, it serves every phase of business and private life at home, and is taking a leading part in the expansion of trade in foreign markets.

WORLD HAPPENINGS  
BRIEFLY TOLD

Lady Jane Moreton, mother of Lady Blyth, died at Brighton, England, very suddenly at the age of 83 years. She was the widow of Sir Richard Moreton, son of the Earl of Duich, who died in March, 1927.

William Johnson, a powder monkey when the last shots were fired in the Crimean War, and a witness of the last hanging for naval mutiny, died recently at Weymouth, England, aged 85.

The British Admiralty has announced promotion of Admiral Sir Osmond Brock to be Admiral of the Fleet, to fill the vacancy caused by transfer of Admiral Sir Charles Madden to the supplementary list.

Conceded among the ship's paint supplies, which are stored in the forepeak, 108 tons of opium valued at \$18,000 were seized by customs examiners on board the "Empress of Asia," of the Vancouver-Orient service. No arrests were made.

A site of 62 imported cattle by R. H. Bull and Son, at their farm near Brampton, Ont., brought total receipts of \$29,724. It said the sale was the largest of January ever held in Canada and the average price of \$120.3 has never been equalled on the continent since 1920.

Official circles have considered that the government was contemplating the possibility of voluntary curtailment of naval building as a gesture supporting building expansion announced by Premier Ramsey MacDonald, of Great Britain, and President Hoover of the United States.

Seth B. Nicholson, observer at the Mount Wilson observatory, said a gigantic spot has been discovered near the equator of the sun. The spot, described as having eighty times the magnetic intensity of ordinary sun spots, Dr. Nicholson said, was powerful enough to cause serious magnetic storms on the earth.

## A Master Scientist

Dean Boyle, of Alberta University, Accepts Post On Research Council

It may be assumed that when the National Research Council of Canada is able to attract to its staff scientists of the calibre of Dr. R. W. Boyle, M.A., Ph.D., dean of the faculties of physics and applied science at the University of Alberta, who has accepted the post of director of the physics and engineering division of the Council, it will, before long, be able to give a very good account of itself.

Dean Boyle, although only some 45 years of age, is already one of Canada's foremost scientists, ranking not far behind Professor J. C. McEwen, of the University of Toronto. During the war he showed that he was no mere theoretician in his chosen work, for he rendered important service to the British Admiralty in perfecting a device for the detection of submarines. His scientific and creative mind has also been responsible for devices for the detection of icebergs. He appears one of Canada's master scientists, and he has been given two of its staff to the National Research Council. Dr. H. M. Tory, chairman of the council, is a former president of that institution.

## Honey Extraction Plant

The latest machinery is being installed in the new extension to the plant of the Hield Honey Company, at Taber, Alberta, and prospects appear to be first class. The new addition will be for honey extraction, a daily output of about 9,000 pounds is expected during the active season.

## Sheep Shearing in Alberta

Sheep shearing in the Picture Butte District, Alberta, is now about finished. Last year's crop was only five fleeces in the district; this year there are 23, mostly ranging in size from 35 to 150 ewes.

## Want Night Air Service

Demand From Hamburg, Germany, To be Included in Present Plans  
Hamburg, Germany, is demanding that it be included in the present plan for night flying services that are to cover all Europe. The promoters of the service say that the plan they contended that the great importance of their city as a commercial center demands that it should be included. They point out that Hamburg is the junction for air service from Scandinavian countries, and it should at least have night-service connection with Berlin and Rhine via Bremen to enable passengers arriving late in the day to continue their journey.

## Church Collections Suffer

Using Big Nickels Instead Of Quarters in Offerings at Ottawa  
Governments have been blamed for troubles a plenty, but Canada's law-makers are cited as the cause of one ill. Decrease in church collections is the latest trouble laid at the door of the Dominion Government, and an Ottawa churchman has made the charge.  
With the advent of the "big nickel," church collections have fallen off, a preacher stated today at a regular Sunday service. "The large five-cent pieces," he said, "are dropped into the collection plate with a flourish that belongs to nothing less than a quarter. I don't blame the emblems on the people, I blame the Government."

## HIGHLY PRIZED TROPHY

This is the Beatty Trophy, presented by the chairman and president of the Canadian Pacific Railway, for inter-regional competition among the pipers of Canadian Highland Regiments, to be played for at the Highland Gathering and Scottish Music Festival scheduled to be held at Banff August 30 to September 3. The gathering brings together pipers from all over Canada, and is held at Banff, Nova Scotia to British Columbia, and is the great event of the year in Scottish-Canadian circles.

## Riches Of Northland

Valuable Treasure House of Precious Minerals in Northern Canada  
Last week Mr. W. C. Cain, Deputy Minister of Lands and Forests of Ontario, who has been studying northern Ontario all his life and is an enthusiast for that country, stated that in his recent trip to the far north he was given a picture of northern possibilities that was beyond his previous ideas on the subject. Some time ago "The Financial Post" told of the existence of a vast bed of amber underneath a lake in Northern Manitoba. Already as a result of the publication of this article, which incidentally drew comments in British and American as well as Canadian papers, private parties have set on foot plans for the complete exploration of this deposit. Last week another article in this paper told of various indications of precious stones in the north and even suggested the possibility of diamonds being found.

Gold and silver are now common places in our northern picture and platinum is becoming almost familiar to our mining men. Iron ore in vast quantities exists in Ungava and on the islands of Hudson Bay and aluminum can be extracted from northern clays. Copper deposits are known to exist in Northern Saskatchewan and run into the Arctic Circle and air voyagers have skinned down upon the surface of lakes to the far north to find nickel and other base metals.

The north is an amazing country in future wealth. Canada can no longer be regarded as a narrow belt 3,600 miles long. It is a vast country approximately 3,000 miles square, and as its promise in the far north as in the east and the west. Moose Jaw Times.

## Nashatchewan Farm Loans

Since the Farm Loans board was inaugurated in 1917, more than 4,500 farmers throughout the province of Saskatchewan have received advances by way of loans from the board to December 31, 1928, according to the department of the treasury of that province. From the inception of the scheme to that date a total of \$13,000,000 had been loaned to farmers.

## LATEST OCEAN GREYHOUND

May Build New Motor Road  
Malpene Lake, the most magnificent region of the Canadian Rockies, accessible now to trail riders and hikers, may be reached by auto next summer. Hon. Charles Stewart, Minister of the Interior, who left Jasper for Vancouver and Victoria after several days in the National Park, stated before he left that he would ask for an appropriation for the building of a motor road.  
Since 1918 1,250,000 houses have been built in England, providing homes for five or six million people.

## Ask Daylight Saving

Act For Dominion  
Move Being Made By City Council  
Of Montreal, Quebec  
In reply to a resolution from the city council of Stratford, Ont., in which the local council was requested to petition the Dominion Government to pass legislation by which summer time would be made effective throughout Canada, special council instructed the city clerk, George Beach, to obtain information as to whether Stratford council is asking for daylight saving time for the summer months only or all the year round.  
In the communication received, it was pointed out by the Stratford council that the Dominion Government had already been approached and petitioned by the former body. The Regina telegram was in favor of Dominion-wide daylight saving time being established for the summer months, but are opposed to it being effective all the year round.

## Recipe For This Week

(By Betty Barclay)

## PARSNIP SOUFFLE

Cook four medium-size parsnips in boiling water. When tender, remove the skins and rub through a colander. Mix together one teaspoon salt, one-eighth teaspoon pepper, one teaspoon sugar. Add the seasonings and one tablespoon of butter to the parsnips. Melt two tablespoons of butter in a saucepan, stirring in two tablespoons of flour and one cup of milk. Be sure the mixture is thick and smooth. Add to the parsnips, together with the yolks of two well-beaten eggs. Beat the whites of the eggs until stiff and fold into the mixture. Put in a buttered baking dish and bake for 25 minutes in a moderate oven. Serve immediately, or the souffle will fall.

## PINEAPPLE PUNCH

1 quart water.  
2 cups sugar.  
1 cup fresh pineapple.  
1 cup orange juice.  
1 cup lemon juice.  
1 cup water, sugar and pineapple 20 minutes. Add fruit juices, cool, strain and dilute with fresh water if necessary. Either fresh or canned pineapple may be used.

## A New Safety Device

Polish Flyers Make Test Of Life-Saving Overalls

"Life saving overalls" designed for trans-Atlantic flights, were given successful tests in Lake Maggiore. Today two Polish flyers, who hope to fly from Milan to Chicago in mid-August.  
The overalls are of an especially heavy rubberized fabric, equipped with valves by which they may be inflated. They will keep their wearers afloat for many days, their inventor asserts.

An added novel feature of the raft is the equipment of electric batteries, which will enable them to remain illuminated at least 60 hours. De Favari says.

## May Build New Motor Road

Malpene Lake, the most magnificent region of the Canadian Rockies, accessible now to trail riders and hikers, may be reached by auto next summer. Hon. Charles Stewart, Minister of the Interior, who left Jasper for Vancouver and Victoria after several days in the National Park, stated before he left that he would ask for an appropriation for the building of a motor road.

Since 1918 1,250,000 houses have been built in England, providing homes for five or six million people.

## KISSED BY MONARCH

Percy Greenough, 14, discovered a baby moose not many days old about two miles from his home, McLeod Greenough's farm at Upper Newport, Hants County, Nova Scotia and near the main line of the Dominion Atlantic Railway. It had been abandoned by its mother and Percy's first thought was to shelter his new-found pet. Master Moose was quite contented to be rescued and took kindly to a spoon, and acted a nursing bottle. It gained weight daily and now romps with the children around the farmyard. Photograph shows the affectionate little playmate. Few children can claim the unique distinction of having been kissed by a monarch of the wilds. The cut was taken by its mother and Percy's first thought was to shelter his new-found pet. Master Moose was quite contented to be rescued and took kindly to a spoon, and acted a nursing bottle. It gained weight daily and now romps with the children around the farmyard. Photograph shows the affectionate little playmate. Few children can claim the unique distinction of having been kissed by a monarch of the wilds. The cut was taken by its mother and Percy's first thought was to shelter his new-found pet. Master Moose was quite contented to be rescued and took kindly to a spoon, and acted a nursing bottle. It gained weight daily and now romps with the children around the farmyard. Photograph shows the affectionate little playmate. ### Local News

Mrs. W. Smith and children, of Calgary, are visiting with Mrs. W. E. Sambrone.

Mrs. A. Macgregor visited for a couple of days in Medicine Hat this week with Mrs. Giffin.

A son was born to Mr. and Mrs. E. L. Moore at the Bassano hospital on Friday, August 2nd.

Mrs. Wm. McKay, of Orem has returned home after having an operation performed at the hospital.

A daughter was born to Mr. and Mrs. J. O. Hansen of Majorville on Monday, August 5th.

A son was born to Mr. and Mrs. Hyatt, of Orem on Monday, August 5.

Olga Dupont of Chazy was operated on at the Bassano Hospital for a ruptured appendix.

A new Osa Oxygen machine has just been installed at the local hospital, at a cost of \$200.00.

ROBINSON CRUSOE (by George Woden)

The train stopped on the sand hills by the sea.

The locomotive hissed quickly.

A seabird called—no other sound beside

The melancholy murmur of the tide.

Wild thyme I saw, and thistles, tufts of green

And silny weeds on rocks, with pools between.

And the old man rose and put his head

Out of the window: "Sonny, look," he said,

"Over beyond that net, you leaning post,

Robinson Crusoe lived upon this coast."

I saw the swaying palm trees rising high

To burst green feathery rockets in the sky.

Deep down a coral forest in dim light

Where scarlet fishes swim, and at night

The water burned with phosphorescent glow—

Stars in the heaven, and in the sea below,

I saw the tall-tale footprints in the sand;

The war canoes came racing in, a band

Of fierce-eyed cannibals who roasted men

Oh, for the grand days of adventure then!

The old man guessed my thought and laughed: "Ay, ay,"

Said he, "It's no much worth, just sea and sky.

Goy could it is, an' bleak, but he was glad,

Nae doubt, to be at home again, my lad."

Japs of Travel

There is a movement on foot to supplant the old-fashioned Pullman waiters with chic and pretty waitresses. You see, when the train lurches, some of the patrons would prefer to find something in their laps more attractive than a bowl of soup.

—Boston Herald.

Showing of Ladies' Dresses

We have just received the following letter from

The Emery Co. Ltd.

EDMONTON

Mr. A. McKee,

Bassano, Alberta.

Dear Sir: I will be in Bassano the week of August 12th with a full line of dresses. This showing will include a real hang-up line of Crepelette, Otomans, Serges, Castons, Georgetown, Saline, and Velvete in the very latest designs, as well as our usual line of House Dresses and Smocks and also Nurses' Uniforms.

The Emery Co. Ltd. feel that this is the best line of dresses ever shown by them, and I am looking forward to having the pleasure of showing them to your customers.

Yours very truly,

THE EMERY CO. LTD.,

per F. M. Owens.
